

## Our prices

Organising successful mailing campaigns is never an easy task. The quality of the selected addresses is a crucial factor. Our database is updated daily, so you avoid expensive "returns to sender".

At the addresses shop, another SWISSFIRMS online product, you can choose potential customers from a list of 12'000 member companies of the Swiss Chambers of Commerce. You can select your target groups according to the following criteria:

- area of activity;
- number of employees;
- region/canton.

The prices remain the same, whether you order the addresses from SWISSFIRMS Data SA, the Chambers of Commerce that hold a share in SWISSFIRMS, or whether you place your orders online with the addresses shop. However, if you purchase the addresses online you will not be charged the research fees.

## Product range

SWISSFIRMS members enjoy a 25 % reduction on the prices below.
